

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

SCIENCE

A WEEKLY JOURNAL DEVOTED TO THE ADVANCEMENT OF SCIENCE, PUBLISHING THE
OFFICIAL NOTICES AND PROCEEDINGS OF THE AMERICAN ASSOCIATION
FOR THE ADVANCEMENT OF SCIENCE.

FRIDAY, MARCH 17, 1905.

CONTENTS:

<i>Alpheus Spring Packard</i> : PROFESSOR J. S. KINGSLEY, PROFESSOR CARL BARUS.....	401
<i>The Astronomical and Astrophysical Society of America</i> : DR. FRANK B. LITTELL.....	406
<i>Scientific Books</i> :—	
<i>Die Moore der Schweiz</i> : PROFESSOR W. F. GANONG	424
<i>Scientific Journals and Articles</i>	425
<i>Societies and Academies</i> :—	
<i>The New York Academy of Sciences, Section of Geology and Mineralogy</i> : PROFESSOR A. W. GRABAU. <i>The Philosophical Society of Washington</i> : CHARLES K. WEAD.....	425
<i>Discussion and Correspondence</i> :—	
<i>Recent Washington Rhizobia Experiments</i> : PROFESSOR ALBERT SCHNEIDER.....	428
<i>Special Articles</i> :—	
<i>A New Code of Nomenclature</i> : DR. J. A. ALLEN	428
<i>Current Notes on Meteorology</i> :—	
<i>Meteorological Results of the Blue Hill Kite Work</i> : PROFESSOR R. DE C. WARD....	433
<i>Meeting of the British Association in South Africa</i>	435
<i>Joint Announcement of Summer Field Courses in Geology</i>	437
<i>Scientific Notes and News</i>	437
<i>University and Educational News</i>	440

MSS. intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y.

ALPHEUS SPRING PACKARD.

ALPHEUS SPRING PACKARD, for twenty-six years professor of zoology and geology in Brown University, died at Providence, February 14, 1905. He was born at Brunswick, Maine, February 19, 1831. His father, for whom he was named, was for over sixty years connected with the Bowdoin College faculty, and his grandfather, the Rev. Dr. Appleton, was one of the early presidents of the college.

At the age of eighteen he entered Bowdoin and there came under the influence and instruction of the late Paul Ansel Chadbourne, who fostered and encouraged his natural inclination towards zoological work. Dr. Chadbourne at this time was also connected with Williams College and it was through him that Packard became a member of the Williams College expedition of 1860 to Greenland and Labrador, with which he went only as far as Labrador, where he spent two months collecting, getting back to college in time for the studies of senior year. In the senior vacation he, with several other Bowdoin students, went on a dredging trip to the Bay of Fundy.

Immediately after graduation in 1861 he accepted the position of entomologist to the newly established scientific survey of Maine and in this capacity he traveled through a large part of the northern wilderness of the state. On this expedition he made the first discovery of Silurian fossils in the northern part of Maine and obtained material for several articles which were published in the first two reports of the survey.
